# LANNIE FLOWERS

## Live In NYC

Lannie Flowers is a standard bearer for the Power Pop resurgence currently taking hold across the world. Combining diverse influences such as Badfinger, The Raspberries, Big Star, Alice Cooper and The New York Dolls, Lannie puts forth guitar driven melodies that are at once fresh yet familiar. Following the successful reception of "Circles," winner of LA Music Awards 2013 "Record of the Year," Lannie has released his first live album.

As documented on "Live In NYC," those who showed up to break the drudgery of reconstruction after Hurricane Sandy were greeted with a solid set of power pop and roll to lift their spirits out of the mire. Drawing from "Circles" and "New Songs Old Stories," Lannie and the band proudly provided a ray of hook driven sunshine to their guests. Our heroes also paid homage to Alex Chilton and his much loved Big Star by performing a faithful rendition of "Back Of A Car," the first **single** released from this album.
